MOTOROLA MOTOTRBO RADIO ADAPTOR

DESCRIPTION

This adapter provides a practical and cost effective solution to overcoming the different connection types of Motorola 2 pin earpieces and Motorola MotoTRBO multi pin radios. You simply plug in your 2 pin Motorola earpiece or headset into the adapter and then plug the adapter into your multi pin Motorola MotoTRBO radio to immediately start making seamless calls.

When you work in challenging environments, such as door security or close protection, it's vital that your Motorola 2 pin earpiece will be connected seamlessly to your Motorola MotoTRBO multi pin radios. When an adaptor is made from cheap materials, which haven't been designed for the wear and tear of demanding environments there is a heightened risk of it malfunctioning or breaking without warning.

As with all the products in our range, our adaptors have been tested to ensure it meets our high standards of build quality and reliability. This gives you the reassurance knowing that you will be able to communicate clearly with team members at all times without the risk of the adapter malfunctioning.
